Life long learner and problem solver with background in customer service; effectively crafting solutions and products to meet client needs. Seeking an environment to develop and improve software products and services.

TECHNICAL SKILLS

- Java, JavaScript, Vue.js, React.js, PostgreSQL, HTML, CSS, Spring Boot, Responsive Design, IntelliJ, Git, Unit Testing (JUnit), E/R diagrams, Integration Testing, Windows, Linux

TECHNICAL EXPERIENCE

- **connor-ray.com** - A personal portfolio website created in both Vue and React!
- **Contract Work** - Created client proposed version of the Mitre ATT&CK Navigator for private use.
- **VendingMachineInterface** - A vending machine application written in Java. Created an application to manage a vending machine.
- **TEnmo** - An API / application for sending and receiving TE-Bucks. This project utilizes Java and Spring Boot to simulate sending and receiving virtual cash!
- **Contract Work** - Worked as a Data Analyst to combine and generate required data files.
- **ComicCollection** - A full stack comic book collection management website. This project utilizes a PostgreSQL database, a Spring Boot REST API, and a Vue UI to allow users to manage comic book collections.
