Life long learner and problem solver with background in customer service; effectively crafting solutions and products to meet client needs. Seeking an environment to develop and improve software products and services.

TECHNICAL SKILLS

• Spring Boot, Java, PostgreSQL, HTML, CSS, JavaScript, Vue.js, Responsive Design, IntelliJ, Git, Unit Testing (JUnit), E/R diagrams, Integration Testing, Unix

TECHNICAL EXPERIENCE

- **Superalgos** Open source algorithmic trading software written primarily in JavaScript and using Node.js. As a developer and moderator for the project my efforts have been focused between implementing new features, system hardening, and user support for the API / machine learning portions of the project.
- **VendingMachineInterface** A vending machine application written in Java. Created an application to manage a vending machine.
- **TEnmo** An API / application for sending and receiving TE-Bucks. This project utilizes Java and Spring Boot to simulate sending and receiving virtual cash!
- **ComicCollection** A full stack comic book collection management website. This project utilizes a PostgreSQL database, a Spring Boot REST API, and a Vue UI to allow users to manage comic book collections.

EDUCATION

Tech Elevator, Cleveland, OH

September 2022 – December 2022

A 14-week full-stack coding bootcamp learning how to create dynamic web-based software systems using Java providing 800+hours of development education and application.
